Planning for Winter Pressures

“The weather outside is frightful” or so the forecast predictions for this winter say. With the added pressure on an already stretched NHS, the focus is all about planning for this busy winter period. High costs from illnesses and injuries from trips and falls, means hospitals tend to see a rise in the number of frail and vulnerable patients. Handicare has planned and prepared key equipment to manage the overall rise in patients, facilitate easier discharge and assist patients to stay in comfort at home.
